

AI is Evolving Before our Eyes

“Even the most advanced AIs today have less common sense than a house cat.”

Yann LeCun, 2020

“In some narrow domains, AI might perform like a 4-year-old, but it lacks the general understanding and flexibility even a toddler has.”

Gary Marcus, 2022

“AI systems now outperform the average human on many graduate-level benchmarks.”

2025 Stanford AI Index Report
